

ANKITA GONDALIYA

Flutter Developer | Mobile App Engineer | AI-Augmented Developer

+91 9879385919 ankitagondaliya05@gmail.com Rajkot, Gujarat
https://www.linkedin.com/in/ankita-gondaliya-2165a9380 https://github.com/ankitatops

PROFILE

Results-driven Flutter Developer with a BCA degree and hands-on experience building cross-platform mobile applications. Skilled in Dart, Firebase, and REST APIs. Integrates AI tools to accelerate development cycles and deliver smarter, more reliable apps. Passionate about building scalable mobile applications and continuously learning modern Flutter technologies.

EDUCATION

BCA – Bachelor of Computer Applications

Shipra College, Saurashtra University, Rajkot

12th Commers

P&B School, Rajkot

TECHNICAL SKILLS

Languages & Frameworks

Dart	Flutter
C	C++

Databases & Storage

SQL	SQLite / Sqflite
Firebase Firestore	Shared Preferences

Tools & Platforms

Git & GitHub	VS Code
Android Studio	REST APIs

AI Tools

Google Gemini	GitHub Copilot
Claude	ChatGPT

CERTIFICATIONS

Flutter Developer Certification

TOPS Technologies Pvt. Ltd. · 2026

PROJECTS

Digital Society – Society Management Mobile App

Tools: Flutter · Dart · SQLite · REST API

GitHub: [ankitatops/digital_society](https://github.com/ankitatops/digital_society)

- ▶ Developed a Flutter-based society management application to simplify daily residential operations.
- ▶ Implemented member management, maintenance tracking, and event management modules.
- ▶ Crafted a clean, responsive UI following Material Design guidelines, optimized for both Android and iOS.
- ▶ Applied form validation, error handling, and reusable widgets to improve application performance and maintainability.

AI Tools Used:

- ▶ Used **ChatGPT** to debug application issues, and optimize project structure.
- ▶ Used **Google Gemini** to explore implementation approaches, optimize application logic, and resolve development issues.

BookMate – Book Management Mobile App

Tools: Flutter · Dart · Firebase Authentication · Cloud Firestore

GitHub: [ankitatops/Flutter_Workspace/Assessment/task3](https://github.com/ankitatops/Flutter_Workspace/Assessment/task3)

- ▶ Developed a Flutter-based book management application for organizing and managing personal book collections.
- ▶ Implemented secure user authentication using Firebase Authentication (Sign Up, Login, and Logout).
- ▶ Integrated Cloud Firestore for real-time storage and synchronization of book data.
- ▶ Implemented a favorites feature to allow users to bookmark and manage preferred books.
- ▶ Added search functionality to quickly find books by title.
- ▶ Designed responsive and user-friendly UI following Material Design principles.
- ▶ Applied form validation, error handling, and reusable widgets to improve application reliability and maintainability.

AI Tools Used:

- ▶ Used **ChatGPT** to generate Flutter widgets, debug application issues, and improve UI design.
- ▶ Used **Google Gemini** to explore Firebase integration approaches and optimize Firestore data structure.

LANGUAGES

Gujarati (Fluent) · Hindi (Fluent) · English (Conversational)

STRENGTHS

- Leadership & team coordination
- Critical thinking & problem solving
- Public relations & communication
- Fast learner with growth mindset

EduTrack – Educational Mobile App (UI Design)

Tools: Flutter · Dart · Material Design

GitHub: [ankitatops/Flutter_Workspace/Assessment/task1](#)

- Designed and developed a modern educational mobile application UI using Flutter.
- Created responsive Login and Registration screens with clean and intuitive layouts.
- Designed a user-friendly Home Dashboard for quick navigation to academic modules.
- Developed attractive UI screens for Lessons, Announcements, Daily Schedule, Profile, and Settings.
- Focused on improving user experience through clean navigation and visually appealing UI components.

AI Tools Used:

- Used **Google Gemini** to explore modern UI design ideas and improve screen layouts.

AI TOOLS & WORKFLOW

Google Gemini	Designs Firebase architecture, generates security rules, reviews code for bugs, and suggests UI/UX improvements during prototyping.
Claude	Debugging complex Flutter logic, refactoring code, optimizing application architecture, and improving code readability and documentation.
ChatGPT	Debugging complex async/await flows, REST API issues, and writing meaningful code comments and documentation.

WHY HIRE ME

- **BCA graduate with a strong foundation in Flutter and mobile application development.**
- **AI-native developer who effectively utilizes AI tools to enhance productivity, solve problems, and write efficient, well-documented code.**
- **Strong communication, teamwork, and leadership skills developed through academic projects and training.**
- **Fast learner, adaptable, and motivated to contribute to organizational success from Day 1.**
